

## USPS-LR-N2011-1/NP1<sup>Accepted 8/19/2011</sup>

## Distance (in Miles) to the Nearest Retail Location

Only about 11% are greater than 10 miles from the nearest Retail Location

For purposes of my testimony, the term 'retail locations' includes Post Offices, stations, branches, retail annexes, and Contract Postal Units

1. Proximity to the nearest Retail Location is based off of coordinate distance, rather than driving distance.

The sample includes 13,494 Retail Locations out of 16,312 Retail Locations with <\$100K WIR, for which latitude and longitude data were available.
